

**Diver Look H3 Quartz**  
6594Q-a15-Nato-31 Ø 46mm

The Superluminous dial and hands ensure perfect legibility.  
Reliable and standardized according to military specifications.

## Teflon coated sport watch with trigalight Swiss illumination technology

The H3 Sport watch use the trigalight® illumination tube of MB Microtec®.  
A Swiss made quality product with an unreached readability in darkness. The illumination is independent of a battery and does not need sunlight for charging.

Trigalight® are small, airtight sealed glass tubes, coated with a luminous substance and tritium gas. Electrons emitted from the gas excite the material to give off a permanent, cold light.

## **About ZENO-WATCH BASEL**

ZENO-WATCH BASEL is an independent Swiss watch manufacturing and specialized in producing mechanical timekeepers, pilot and oversized wrist watches, with headquarters in Basel, Switzerland and independent affiliates in Europe and Japan. ZENO-WATCH BASEL is not tending towards a mass-produced product, but rather to becoming an important manufacturer for watch collectors and enthusiasts of large wrist watches.
